# The Problem

## Why gifting still feels inefficient

- ▶ Companies need gifts that feel **thoughtful**, not generic.
- ▶ Procurement teams often manage gifting through **manual chat, spreadsheets, and ad-hoc vendors**.
- ▶ Personal buyers want **fast curation**, custom notes, and reliable delivery.
- ▶ Existing options usually lack **branding, bundling, and tracking** in one place.

### Pain Point 1

Too many manual steps from selection to shipping.

No clean dashboard for bulk orders and repeat gifting.
